

Wireless WiFi Connection

Residential WiFi IP Intercom System

The VIP Vision WiFi Residential IP Video Intercom features wireless connectivity making it one of the easiest systems to install. Experience a multitude of modern intercom features, all using your existing WiFi infrastructure.

Enjoy two-way video/audio talk, visitor video messaging, record door station camera snapshots/footage and more. The door station can even be used without the monitor by connecting via WiFi to your phone or tablet. Ideal for homes, apartments, duplexes and business, the VIP Vision WiFi Intercom series also integrates with most door strikes and sensors.

1
Install your WiFi intercom system simply by connecting to power

2
Connect your WiFi intercom to your network and the Internet

3
Live view, snap images, answer visitors and even unlock doors from anywhere
