Preliminary

Video Intercom System (for apartment, condominium) VL-V900 series

Key Features

Supports large apartment systems

3 lobby stations and 560 room monitors are supported for a building. When connected to a PBX system (for instance, the Panasonic KX-TES824 system), 4 guard stations and multiple buildings are supported.

Provides safety and security to residents

- 1) Answer visitors after checking their face. Check visitors using a smartphone (VL-MNV511 only) or the wireless monitor (VL-MW251 only).
- 2) Record the image of visitors and check them at any time.
- 3) Monitor common surveillance cameras from your own room.
- 4) Notify of accidents (fire, injury, etc.) to reception, another station via a PBX.

Easy and low cost installation

The system mainly needs only 2 wire cables (1 pair of cables), and less equipment. It provides an easy way to link up rooms in one location using a PC, and can also be set up with a room monitor in every room.

Safe and convenient maintenance functions

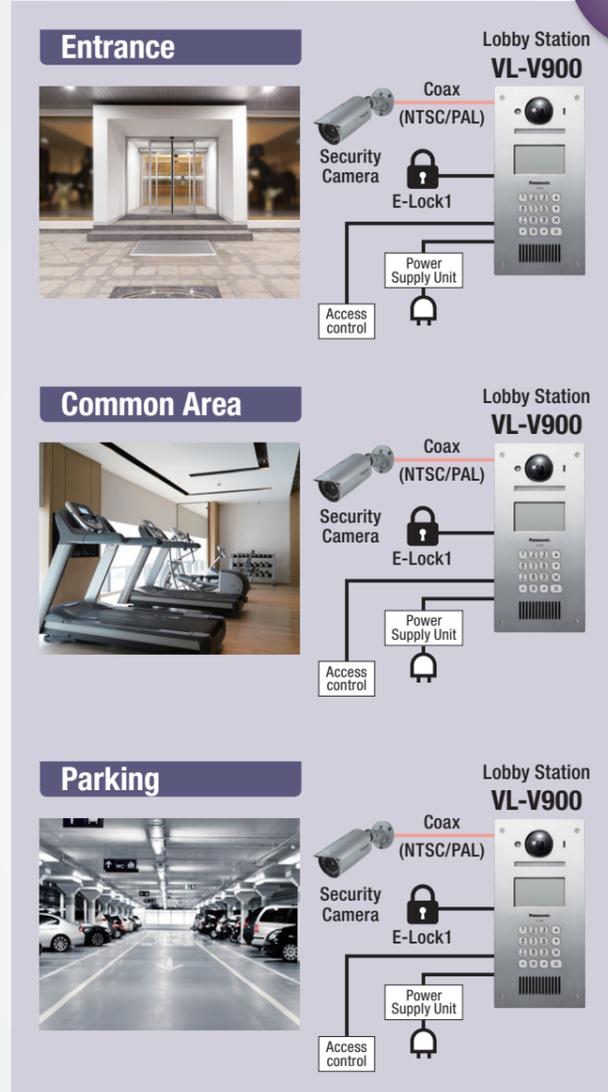

The system provides a self-diagnostic function to identify errors. It is easy to change the equipment and re-link. Log function for recording the face of visitors and the date.
